

APSS Sentinel™ - Mobile Dispatch

APSSentinel™ is Alert PSS' Next Generation of Mobile Dispatch. User-friendly and consistency highlights the Mobile navigation process.

In today's public safety, it is imperative that the officer has all of the tools available to make sure that safety for his/her well being and the safety of citizens is the first priority. APSSentinel™ quickly provides the officer in the field the information that allows safety to be first.

Not only is critical CAD/RMS data available, but State and Federal data is available as well. Alert PSS patent pending APSS Gateway can provide data from many external data sources providing the ultimate in information data sharing to protect the first responder and the public right to the mobile device through APSSentinel™
